

CORPORATE PROFILE

www.futuregenenergy.co.za

Overview

- *With over a decade of experience and leadership in energy, we understand the challenges and opportunities of the sector.*
- *We provide holistic solutions - from renewable technologies to petroleum equipment and EV support systems.*
- *Our strong alliances with global OEMs ensure our clients receive world class products backed by technical excellence.*
- *We place sustainability at the heart of everything we do, helping our clients transition to cleaner, safer, and more efficient energy solutions.*

The Company

Founded in 2008, Future Generation Energy (FGE) was established with a bold vision: to reimagine the energies of the future. Triggered by the challenges of persistent load shedding and electricity outages, FGE began its journey by providing solar geysers and panels, giving households and businesses an opportunity to embrace renewable alternatives.

As the energy sector evolved, so did we. Leveraging strong industry experience and deep-rooted networks, FGE expanded its footprint to become a trusted partner in the distribution of petroleum engineering equipment and next-generation energy solutions.

Through strategic collaborations with leading Original Equipment Manufacturers (OEMs), we are committed to delivering innovative, safe and sustainable technologies that drive energy transition across Africa and beyond.

*Reimagining
energy
solutions of
the future.*

The Company

Our founder brings over 16 years of experience in the oil and gas sector and under his leadership, FGE has steadily grown into a recognized player in the energy landscape - blending renewables, petroleum solutions and future-focused technologies to meet the dynamic demands of modern industries.

Looking Ahead

The future of energy is evolving, and FGE remains at the forefront of this transition. By combining renewable technologies, petroleum solutions, and the electrification of transportation, we are redefining how energy is produced, distributed and consumed.

At FGE, we are not just responding to energy challenges - ***we are shaping the future of energy.***

Our Mission

To deliver innovative, reliable and sustainable energy solutions that empower communities, industries, and nations across Africa.

Our Vision

To be Africa's leading energy partner, shaping the future through renewables, petroleum innovation and electrification, powering a sustainable and connected continent.

We are committed to advancing the energy transition, providing technologies that ensure efficiency, safety and environmental responsibility while driving economic growth.

Our **Services**

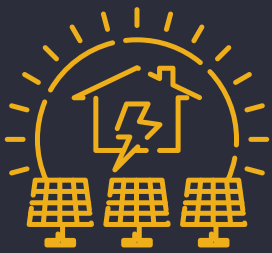

Reimagining energy solutions of the future.

Our Core Services

We offer a diverse portfolio of energy solutions designed to meet the needs of modern industries, businesses and communities. Our services are anchored in innovation, safety, and sustainability - ensuring that every product we deliver contributes to a reliable and future-ready energy ecosystem.

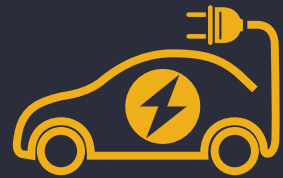

Services include:

Renewable Technology
and Solutions

Petroleum Equipment
and Technology

Electric Vehicle (EV)
Accessories

Our Reach

Future Generation Energy has the capability to serve clients across all African markets. Through strong OEM partnerships, a trusted distribution network, skilled project teams, we ensure our solutions are accessible wherever operations take place.

From urban hubs to remote industrial sites, we deliver energy technologies with efficiency, safety, reliability. Our ability to scale operations across borders makes us a pan African energy partner of choice, supporting governments, industries, businesses in advancing the continent's energy transition.

Our Core Services

1. Renewable Technology & Solutions

We provide integrated renewable energy systems that reduce dependence on traditional power grids and help clients transition to cleaner, more cost effective energy sources.

Our offering includes:

- **Solar Geysers and Water Heating Systems:** designed for efficiency and long term savings
- **Solar Panels & Photovoltaic Systems:** tailored installations for residential, commercial and industrial use
- **Hybrid Energy Systems:** combining solar, storage and backup power to provide energy security during outages
- **Consulting & System Design:** professional advice and project execution to maximize return on renewable investments

Our expertise helps clients transition smoothly to sustainable energy systems that deliver long term value and independence from unreliable grids.

Our Core Services

2. Petroleum Engineering Equipment & Solutions

Through strategic partnerships with leading Original Equipment Manufacturers (OEMs), FGE is capable of sourcing through its established network high quality, durable equipment and technologies that power the oil and gas sector.

Our solutions include:

- High quality products that ensure efficiency and reliability
- Products that are compliant with safety and operational performance
- Innovative and economical products

By combining local expertise with global technology standards, we deliver petroleum solutions that keep operations running safely and seamlessly.

Our Core Services

3. Electric Vehicle (EV) Accessories & Solutions

As the global energy transition accelerates, the rise of electrified transportation presents both opportunities and challenges. FGE provides the products and expertise to support this growing sector.

Our EV offerings include:

- **EV Charging Stations:** scalable solutions for residential, commercial and fleet applications
- **Charging Cables & Adapters:** compatible with various EV models to ensure convenience and safety
- **Smart Charging Systems:** integrated with IoT technology for real time monitoring and energy optimization.

By providing EV infrastructure and accessories, FGE supports Africa's move toward cleaner mobility and reduced carbon emissions.

Working **with** FGE

Future Generation Energy is dedicated to delivering tomorrow's energy solutions today. Whether through renewable technologies, petroleum expertise, or electrification, our promise is to empower industries, communities, nations with energy solutions that are reliable, innovative and sustainable.

Our Future

At Future Generation Energy, we see the future as an opportunity to lead Africa's energy transformation. Our focus is on expanding renewable technologies, advancing petroleum innovations and accelerating the adoption of electrification solutions that meet global standards.

By continuously investing in partnerships, research, and capacity, we are preparing to deliver smarter, cleaner, and more resilient energy systems that power sustainable growth for generations to come.
